CORRIGENDUM

The effect of flow rate upon the magnitude of the olfactory response differs for different odorants

by M.M. Mozell, P.F. Kent and S.J. Murphy

The authors wish to bring to your attention that the values given in Table II for stimulus volume, which are listed in cm$^3$ in the column headed by $V$, were clerically misstated and did not agree with the values given in the text. None of the other values in the article or any of its reported findings and interpretations were affected by this clerical error. The correct values for this column from top to bottom should have read in cm$^3$ as follows: 0.405, 0.70, 1.28, 2.20, 0.405, 0.70, 1.28, 2.20, 0.405, 0.70, 1.28, 2.20, 0.405, 0.70, 1.28, 2.20, 0.405, 0.70, 1.28, 2.20, 0.405, 0.70, 1.28, 2.20.
